<i>Marti Franqués Medal address</i> Corrosion problems in small and medium sized enterprises: a challenge for the corrosion community	
E. Heitz	38
Local strain rate at crack tip: implications in stress corrosion cracking	
J. Toribio	41
Use of electrochemical impedance spectroscopy for study of CO ₂ corrosion prevention by batch treatment inhibitor films	
S. Bailey, Y. J. Tan, and B. Kinsella	49
Early stages of dezincification of α brass immersed in 4%NaCl solution	
A. A. El Warraky	57
Corrosion behaviour of 8090-T851 Al-Li alloy and aluminium in pH 2 solution containing cupric ions	
K. S. N. Murthy, S. Subramanian, and E. S. Dwarakadasa	63
Pitting corrosion behaviour of UNS N08904 stainless steel in chloride-sulphide solutions	
E. A. Abd El Meguid, N. A. Mahmoud, and V. K. Gouda	68
Technical note Influence of molecular structure of substituted benzothiazoles on corrosion inhibition and hydrogen permeation through mild steel in sulphuric acid	
M. A. Quraishi, M. A. Wajid Khan, M. Ajmal, S. Muralidharan, and S. Venkatakrishna Iyer	72
Technical note Atmospheric corrosion of aluminium conductor	
F. Elshawesh, M. El Agaili, and A. Elwaer	77
Correlation model of aluminium pitting potential variation with environmental conditions	
M. Ergun, M. Balbaşı, and A. Tosun	117
Electrochemical behaviour of binary Al-Ga and ternary Al-Zn-Ga alloys as function of thermodynamic properties	
E. Aragon, L. Cazenave-Vergez, E. Lanza, A. Giroud, and A. Sebaoun	121
Electrochemical polarisation and passive film of austenitic Fe-Mn-Cr-Al alloy in aqueous solution	
X. M. Zhu and Y. S. Zhang	127
Corrosion behaviour of mild steel in moderately alkaline to acidic simulated cooling water containing molybdate and nitrite	
C. M. Mustafa and S. M. Shahinoor Islam Dulal	133
Electrochemistry of deformed smooth surfaces and short corrosion fatigue crack growth behaviour	
I. M. Dmytrakh, R. Akid, and K. J. Miller	138
Influence of water uptake on corrosion protection properties of fluoropolymer coatings	
F. Deflorian, L. Fedrezzi, and P. L. Bonora	145
Technical note Influence of quaternary amine alkyl chain length on corrosion inhibition of mild steel in CO ₂ saturated 5%NaCl solution at pH 6.5	
H. Malik	150
Coating technology update New generation of polymer lining systems for cargo tanks	
D. J. Keehan	174
Theoretical basis for designing reinforced concrete cathodic protection systems	
G. K. Glass and N. R. Buenfeld	179
Effect of heat treatment on grain boundary chemistry and resistance to intergranular corrosion of alloys 600 and 690	
C. M. Younes, F. H. Morrissey, G. C. Allen, and P. McIntyre	185
Localised corrosion tests on austenitic stainless steels for biomedical applications	
G. Rondelli, B. Vicentini, and A. Cigada	193
Study of effect of liquid corrosivity in liquid-solid impingement on cast iron and austenitic stainless steel	
A. Neville and T. Hodgkiess	197
Development of electrochemical probe for monitoring hydrogen induced cracking susceptibility of boiler pipe in pickling	
Yufeng Cheng and Yuanlong Du	206
Adsorption of sodium <i>N</i> -phenylanthranilate on iron surfaces from aqueous solutions	
Yu. I. Kuznetsov, N. P. Andreeva, S. S. Veselyi, and S. V. Oleinik	209
Monitoring batch treatment inhibitor performance continuously using electrochemical noise analysis	
Y. J. Tan, B. Kinsella, and S. Bailey	212
Tetrathiomolybdate and tetrathiomolybdate compounds as corrosion inhibitors for protection of Al-Cu alloy	
S. A. Garrett, D. A. Rice, J. R. Rogers, and C. J. E. Smith	217
Technical note Investigation into tarnishing of pewter artefacts recovered from the 'Mary Rose'	
M. I. E. Coward, B. D. Barker, G. A. Mills, and A. M. Jones	223
Stress corrosion monitoring of 7000 series aluminium alloy welded specimens using acoustic emission	
B. Knowlton, A. M. Siddiqui, and S. Jihan	249
Pit formation and growth in sea water on Al-Li 8090 alloy after different heat treatments	
P. Traverso and A. M. Beccaria	255
Influence of alloying elements on electrochemical behaviour of ternary Al-Zn-Ga alloys for sacrificial anodes	
E. Aragon, L. Cazenave-Vergez, E. Lanza, A. Giroud, and A. Sebaoun	263
Comparison of rotating cylinder and loop methods for testing CO ₂ corrosion inhibitors	
S. Nesic, G. T. Solvi, and S. Skjerve	269
Surface scales in sea water systems: effects of their formation on corrosion behaviour of engineering steels	
A. Neville, T. Hodgkiess, and A. P. Morizot	277
Implications of internal cathodic reactions for crevice attack of stainless steels in chloride environments	
A. Turnbull	283
Pitting corrosion of stainless steels in acidic environment	
J. Alhajji	291
Inhibition of steel corrosion by some new triazole derivatives in boiling hydrochloric acid	
M. A. Quraishi, S. Ahmad, and M. Q. Ansari	297
Technical note Effects of dodecylamines on electrochemical impedance spectra of iron at corrosion potential in sulphuric solutions with and without addition of chloride	
T. Du, Ch. Cao, J. Yu, and H. Lin	301
Bengough Award	1
Book reviews	28, 173, 240
Conductive ceramic composites for oxidising and corrosive electroplating applications	9

Conference reports	
Successful applications of corrosion monitoring	30
